

Wound Care for CNAs and LPNs: Preventing, Healing, and Escalating When Needed

Delivery Format: 50 Hours of Multi-Modal Training (Self-Paced)

Prerequisite: Current CNA, LPN, or LVN license (or equivalent)

Course Overview

Chronic wounds and pressure injuries cost U.S. healthcare systems over **\$25 billion annually** and significantly impact patient quality of life. This comprehensive, evidence-based course prepares frontline caregivers to recognize, assess, and manage common wound types while providing compassionate, stigma-free communication and education to patients and families.

Through **50 hours of integrated multi-modal learning**, participants will gain practical skills that translate directly to improved patient outcomes and reduced healthcare costs. The training combines video instruction, comprehensive manuals, educational podcasts, interactive simulations, and on-the-job application to ensure deep understanding and practical skill mastery.

Learning Objectives

Upon completion of this 50-hour training program, participants will be able to:

- **Explain** the difference between acute and chronic wounds and identify key risk factors (e.g., diabetes, poor circulation).
- **Maintain** optimal moisture balance and select appropriate dressings based on drainage level.
- **Perform** competent wound observation, documentation, and photography—including consent protocols.
- **Implement** infection-control best practices and pressure-injury prevention strategies.
- **Communicate** with diverse patient populations—including bariatric and ostomy patients—using inclusive, empathetic language.
- **Recognize** when to escalate care and collaborate effectively with the healthcare team.

Multi-Modal Learning Experience

This course delivers **50 hours of comprehensive training** through five integrated learning formats, designed for busy healthcare professionals:

Video Training Modules

Professional instruction with expert demonstrations, real-world scenarios, and self-paced learning. Watch and rewatch complex procedures until mastery is achieved.

Comprehensive Manuals

In-depth written materials for structured review and ongoing reference throughout your career. Keep these resources at your fingertips for quick consultation.

Educational Podcasts

Audio content that reinforces and synthesizes key concepts—learn during commutes or breaks. Make the most of your time with flexible audio learning.

Interactive Simulations

Hands-on practice in realistic scenarios with immediate feedback to build confidence. Apply your knowledge in safe, controlled environments before working with patients.

On-the-Job Application

Supervised practice in real work settings ensures skills transfer to actual situations. Bridge the gap between theory and practice with guided clinical experience.

Expert Support Throughout

Ongoing access to experienced instructors who provide guidance and answer questions. Never feel alone in your learning journey.

Module Breakdown

Module	Topics Covered	Duration
1. Foundations of Wound Care	Wound classifications • Wound-care crisis & cost drivers • Role of CNAs/LPNs/LVNs	8 hours
2. Physiology & Nutrition	Moisture balance • Protein & vitamin needs • Hydration	8 hours
3. Assessment & Documentation	Acute vs. chronic • Wound bed prep • Photography & consent	10 hours
4. Infection Control & Pressure Injury Prevention	Hand hygiene • Turning schedules • Moisture management	10 hours
5. Specialized Populations	Diabetic foot ulcers • Bariatric skin care • Ostomy management	8 hours
6. Patient Communication & Education	Inclusive language • Reducing stigma • Teaching strategies	6 hours

Total Training Time: 50 hours of multi-modal learning

Who Should Enroll

This training is ideal for:

- **Certified Nursing Assistants (CNAs)** seeking to enhance their wound care competencies
- **Licensed Practical Nurses (LPNs)** and **Licensed Vocational Nurses (LVNs)** wanting to specialize in wound management
- **Long-term care facility staff** committed to improving patient outcomes and reducing pressure injury rates
- **Healthcare professionals** looking to advance their careers through evidence-based specialty training

Benefits, Certification & Enrollment

For Healthcare Professionals:

- Gain specialized skills that enhance career advancement opportunities
- Build confidence in managing complex wound care situations
- Earn a certificate of completion demonstrating professional development
- Access ongoing expert support and reference materials

For Healthcare Facilities:

- Reduce costly complications and hospital transfers
- Improve patient satisfaction and quality of life
- Meet regulatory standards with evidence-based practices
- Strengthen your facility's reputation for quality care

Certification

Participants who successfully complete all 50 hours of training will receive a **Certificate of Completion** demonstrating their commitment to professional excellence in wound care management.
